**THE FIRST RENALL** solid timber door was crafted in our purpose-built factory over 40 years ago. Since day one the company philosophy has remained the same: **use only the very best of renewable local and exotic timbers and employ accurate, flexible leading-edge woodworking technology to consistently construct a solid timber door that a master craftsman would be proud of.** With all essential elements milled from solid wood, to ensure **lifelong elegance and quality.**

We recognise that selecting a door design is a matter of personal choice, dependent on any number of factors. That's why, on the following pages you'll see some of our most popular designs ... but it doesn't stop there. **With a Renall door you are limited only by your imagination.**

Our unique door manufacturing method means **we are able to accommodate most variations in timber, size and design.** If you select an existing Renall profile, changes to your door configuration or dimension can be achieved with little more than a few keystrokes. Now, in New Zealand, you can create an interior or exterior door exactly to your design and dimension requirements, without a penalty for cost and time.

**Woodworking craftsmanship, flexible production methods and leading-edge technology** combine to ensure yours is a custom built, solid timber door made to stand the test of time.

**Renall Doors proudly use reliable and sustainable timber sources.**

***(Applies to both interior and sheltered exterior doors)***

**Standard size doors** - 1980mm x 860mm. Side Lites 1980mm x 460mm. Prices cover up to these sizes.

**Prices for non-standard door sizes** - For any door over the standard size above, please use the following formulas as a guide for pricing:

**Door over 1980mm in height** - Standard price from brochure divided by 1980 then multiply by the height required indicates the retail price of the door.

**Door over 860mm in width** - Standard price from brochure divided by 860 then multiply by the width required indicates the retail price of the door.

If a door is both over-height and over-width, apply the height formula first, then use the price that is given as your list price and continue with the width formula.
